BUILT FOR THE GROUNDS YOU MANAGE

# WHY TERRANOX

The Navimow Terranox is engineered for **large-scale commercial lawn care** — delivering intelligent, efficient, eco-friendly mowing that reduces labor, lowers operating costs, and keeps turf consistently sharp across the most demanding grounds. One machine replaces hours of crew time, night after night, without fuel, fumes, or fatigue.

01

## EFFICIENCY GUARANTEED

UP TO 6 ACRES · 2.2 MPH · 17" CUT

With a mowing speed up to 2.2 mph and a 17-inch cutting width, a single Terranox CM240 covers an area the size of a football field in a day — keeping large green spaces presentable around the clock.

02

## PREMIUM CUTTING QUALITY

DUAL MOTORS · DUAL DECK · 12 BLADES

High-performance cutting motors deliver clean, consistent results across every grass type. Terranox holds uniform turf quality year-round, where traditional mowers struggle with fatigue, uneven cuts, and changing conditions.

03

## CLEAN, QUIET OPERATION

68 DB(A) · ZERO DIRECT EMISSIONS

At just 68 dB(A), Terranox is quiet enough for evening and overnight cycles. With zero direct emissions, it adds no

04

## EFFORTLESS FLEET MANAGEMENT

NAVIMOWFLEET™ · APP & WEB PORTAL

Manage fleets of hundreds of mowers from one platform. A single operator can monitor performance

TECHNOLOGY THAT SETS THE STANDARD

# ADVANCED BY DESIGN

## EASY SETUP

### NO ANTENNA • AUTO MAPPING

GeoSketch™ real-scene maps

Ready to work out of the box. TerranoX detects boundaries and builds freehand maps with a simple drop-and-go process, plus intuitive real-scene edge editing for fast, accurate setup.

## PRECISION POSITIONING

### EFLS™ NRTK

NRTK + 360° Vision + VIO

Triple-frequency Network RTK, 360° camera-based VSLAM, and Visual Inertial Odometry combine for centimeter-level accuracy that stays stable even in complex or partially obstructed environments.

## INTELLIGENT OBJECT DETECTION

### VISIONFENCE™

360° RGB Camera + ToF

Panoramic, high-sensitivity obstacle avoidance recognizes and avoids 200+ obstacle types — including animals and yard objects — for safe operation in busy commercial settings.

## ALL-TERRAIN MASTERY

### AWD SYSTEM

Slopes up to 40° (84%)

An advanced all-wheel-drive system confidently handles uneven ground, rugged paths, and steep grades up to 40° — holding traction and stability without tearing up the turf.

## SAY GOODBYE TO ANTENNAS

NO EXTRA COST

With Network RTK support there's no local antenna to install — connect through the app and the mower is ready. Access is included at no extra cost, with required cellular data provided free, and the mower auto-connects to the nearest, strongest certified signal.
